SUMMARY

Software Engineer with **3 years of experience** building cross-platform mobile apps, backend services, and game systems with React Native, TypeScript, Node.js, PostgreSQL, and Python, for products serving **over one million users**. Google Summer of Code 2022 contributor.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, SQL
- **Mobile:** React Native, React, PixiJS, Android, Capacitor
- **Backend:** Node.js, Express, Django, REST APIs, WebSockets, PostgreSQL, Redis, MySQL, SQLite
- **Cloud & DevOps:** AWS (EC2, S3, SQS, DynamoDB), Linux, GitHub Actions, PM2, Nginx, Git, CI/CD
- **Engineering:** Software Architecture, System Design, Performance Optimization, Native Android Modules, Technical Mentoring

WORK EXPERIENCE

Bhoos Games

Lalitpur, Nepal

Software Engineer

Jul 2024 – Present

- Led engineering for **Callbreak Legend (1M+ downloads)**, owning gameplay responsiveness, stability, and backend reliability end-to-end.
- Designed and shipped an in-game economy and IAP system, turning the product from negative to **consistently positive monthly net profit**.
- Migrated DynamoDB to PostgreSQL via a **zero-downtime online migration**, unlocking analytics that were previously cost-prohibitive.
- Introduced structured logging and eliminated recurring backend crashes and client-side ANRs, **cutting debugging time and stabilizing production**.
- Reduced Android app size by **12%** through dependency pruning and asset optimization.

Associate Software Engineer

Oct 2023 – Jul 2024

- Contributed to development of the Bhoos SuperApp (**8 games, 10K+ downloads**), including finalizing and shipping the **Stacks** card game.
- Developed game UI components for the team's shared React Native UI library, reused across titles in the Bhoos Games app portfolio.

Software Engineer Intern

Jun 2023 – Oct 2023

- Onboarded rapidly onto a proprietary React Native game framework and delivered production gameplay features for Callbreak and Stacks.

PROJECTS

Card Crush

Personal Project

Feb 2025 – Apr 2026

- Engineered a cross-platform Match-3 puzzle game (React Native, PixiJS, Node.js) with **1,024 levels**, a progression system, and ad monetization; reached **660+ downloads** at a **5.0/5 rating**.

PDF Dark Mode

Personal Project

Jun 2022 – Jun 2026

- Built a Chrome/Edge extension for customizable PDF dark mode, growing to **30,000+ weekly active users** on Edge.

Guess The Word

Personal Project

Sep 2023 – Dec 2023

- Built and published a word-puzzle game with remote level delivery via GitHub Pages, avoiding Play Store review cycles; reached **300+ downloads**.

EDUCATION

Tribhuvan University

Master of Science (MSc CSIT) in Computer Science and Information Technology

Nepal

Jan 2026 – Present

Tribhuvan University

Bachelor of Science (BSc CSIT) in Computer Science and Information Technology

Nepal

Nov 2018 – Dec 2022

OPEN SOURCE & AWARDS

Google Summer of Code 2022

Issued by Google and the Python Software Foundation

Sep 2022

- Shipped **50+ merged pull requests** over a 6-month contribution period to the PSF's GSoC blog platform, fixing bugs and adding admin, mentor, and student-facing features.
- Migrated the platform's database from SQLite to MySQL and introduced a **GitHub Actions CI pipeline** with automated PEP8 linting; fixed recurring CSRF and OAuth token-refresh failures.

Hacktoberfest Contributor & HackSquad Moderator

Issued by DigitalOcean and HackSquad

Dec 2023

- Contributed upstream code to open-source tools including **Novu**, **Cap**, and **Postiz** across annual Hacktoberfest participation.
- Facilitated event operations and verified participant entries as a **HackSquad Moderator** for 2 consecutive terms (2022-2023).
